Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

- Species 1 is drawn to providing control and memory access to crypto device by having a MDIO/MDC interface connected to the crypto device, depicted in figure 6c with **claims 1-2, 4-12 and 14-20**.
- Species 2 is drawn to providing control and memory access to crypto device by having separate interface (other than MDIO/MDC), depicted in figure 6b, and defined by **claims 1, 3, 11 and 13**.

The species are independent or distinct because they are directed to related invention. That is, both species are related by the disclosure as being used to provide interface to have memory and control access to the crypto device. In the instant case, the inventions as claimed by claims mentioned above are not capable of use together, they have a materially different design and mode of operation, and they also do not overlap in scope, i.e., are mutually exclusive; and the inventions as claimed are not obvious variants. See MPEP § 806.05(j).

Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, **claims 1 and 11 are generic**.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
